TECHNICAL EXPERIENCE

Temple University – Philadelphia, PA May 2018-Septemeber 2021

Junior BA/ Front End Developer, Continuing Education Systems

- Improved user experience by analyzing site wide content and created insightful user personas that drove redesign efforts for the Office of Noncredit and Continuing Education.
- Documented and completed detailed testing plan for Osher Lifelong Learning Institute's lottery system that found potential defects prior to product release.
- Implemented mobile friendly, responsive design on shopping pages using Bootstrap CSS.
- Used REST API and JavaScript to bridge Temple University's centralized alerting system and noncredit shopping site in order to automatically populate weather alerts.

TedxTempleU – Philadelphia, PA November 2018- April 2019

Director of Web Development and Maintenance

- Designed a user interface for the TedxTempleU event to document event details and drive e-ticket sales.
- Collaborated with a design team to decide theme, layout, and content for the event site.
- Implemented Bootstrap and CSS driven features to landing page in order to increase appeal and ease of navigation.
- Engaged in participant selection process in order to evaluate, diversify and decide program speakers.

TECHNICAL PROJECTS

Employer Customer Relationship Management (CRM) System January 2021 – December 2021

- Created and maintained a Statement of Work based on project requirements.
- Collaborated with teammates on creating a data model to define the division and maintenance of system data.
- Defined differentiation in user access within the system using a use case diagram.
- Proposed features and UI design to client using wireframes. Mocked up system interface using HTML and Bootstrap CSS.

EZ Email April 2021

- Created a multipage C# project that mimics the functionalities of an emailing system.
- Applied login and account creation logic to read and write data to the database.
- Constructed an appropriate data model to maintain emailing information.
- Utilized stored procedures to carry out database operations.
